1 Turn Off Water Supply • Cierre el suministro de agua • Couper l'alimentation en eau

Locate water supply inlets and shut off the water supply valves. These are usually found under the sink or near the water meter. If you are replacing an existing faucet, remove the old faucet from the sink and clean the sink surface thoroughly.

Ubique las entradas del suministro de agua y cierre las válvulas de suministro de agua. Generalmente se encuentran debajo del fregadero o cerca del medidor de agua. Si se trata de un reemplazo de grifo, quite el grifo viejo y limpie completamente la superficie del fregadero.

Recherchez les entrées d'approvisionnement et fermer leurs robinets. Ces robinets se trouvent généralement sous l'évier ou près du compteur d'eau. Si vous remplacez un robinet existant, retirez, le vieux robinet de l'évier et nettoyer soigneusement la surface de ce dernier.

Hot water supply line connects to left inlet indicated by the tag (tag side). Cold water supply line connects to right inlet.

NOTE: Incorrect application of supply lines and fittings may result in the failure or leak of the supply lines and fitting.

La línea de suministro de la agua caliente conecta con la entrada izquierda indicada por la etiqueta (lado de la etiqueta).

La línea de suministro de la agua fría conecta con la entrada derecha.

NOTA: El uso incorrecto de líneas de suministro y de guarniciones puede dar lugar a la falta o al escape de las líneas de suministro y de la guarnición.

La canalisation d'alimentation d'eau chaude se relie à l'admission gauche indiquée par d'étiquette (côté d'étiquette).

La canalisation d'alimentation d'eau froide se relie à l'admission droite.

REMARQUE: L'application incorrecte des canalisations et des garnitures d'alimentation peut avoir comme conséquence l'échec ou la fuite des canalisations et de l'ajustage de précision d'alimentation.
